

```
const res = await fetch('/api/users/1');
```

///HTTP///REST

```
const user = await res.json();
```

```
const user = await api.users.getById({ id: 1 });
```

//

RPC

instead of

trpC

• Designed with TypeScript in mind to allow end-to-end safety

Simplify the development process as types are inferred from actual functions

Doesn't use a separate schema definition language

• Uses regular HTTP/1 and HTTP/2 for transport

Support queries, mutations and subscriptions
