```javascript
const express = require("express");
```

```
const app = express();
```

```
const users = [
```

```
const port = 3000;
```

```
{ id: 1, name: "Lori Griener" },
```

```
// Example data for our API
```

```
{ id: 1, name: "Mark Cuban" },
```

```
// GET endpoint to retrieve users
```

```
app.get("/api/users", (req, res) => {
```

```
res.json({ users });
```

```
app.listen(port, () => {
```

```
console.log(`App Listening at http://localhost:${port}`);
```

```
// Start the server
```

```
.then(response ⇒ response.json())
```

```
.catch(error ⇒ console.error('Error:', error));
```

```
fetch('http://localhost:3000/api/users')
```

```
.then(data ⇒ console.log(data))
```
